

Cait Casey, ARM, CUSA, COSS

Cait has over 25 years of progressive construction and general industry safety management experience. Prior to joining Thompson | Carrier, she spent fifteen years in water treatment, sewer, warehouse, and construction safety management environments. She is experienced in developing and managing safety programs in accordance with OSHA, Cal OSHA, and Army Corps of Engineers standards. Prior to entering the safety field nearly 25 years ago, Cait's experience as a safety instructor and presenter, mechanic, power plant technician, union apprentice, warehouse worker, crane/forklift operator, and vocational high school teacher, uniquely qualify her for the field of safety and management.

As a consultant, some specific onsite projects have included the Naval Aviation Depot and Naval Medical Center (through Sullivan International), Nellis AFB, UC San Diego, and SLO Community College Library (through insurance brokers), and commercial onsite surveys for companies such as Brian Cox Mechanical and Bomel Construction. She has developed specific safety programs for a number of companies in San Diego, including Dorman Construction and Rancho Coastal Humane Society. She is a specialist in Construction and Industrial safety management.

Background/Experience Highlights

- Developed Safety Training Consortium to provide for a specific industry's safety requirements in five western states
- Managed over-site of a group to write specific SOP for a city-wide energy control program for a large municipality, and mid size public agency. Model adopted by agencies and municipalities for wide range of safety services, training and program development
- Created programs to promote worker involvement in risk and safety management
- Developed safety committees and members to lead safety efforts and reduce costs
- Recognized ergonomic improvement needs and designed solutions for: vehicle design, emergency planning, disaster recovery drills, stretching programs, and tool redesign
- Developed certificate training for various companies' safety committees
- Created and implemented self-generated IIPP's
- Coordinated and delivered site-based safety and health training

Education/Certification/Designation

- Xavier University, BA. Philosophy
- Associate in Risk Management (ARM)
- Certified Occupational Safety Specialist (COSS) - Instructor
- Certified Utility Safety Administrator (CUSA)
- OSHA 10 and 30 Outreach Trainer (Construction and General Industry)
- Certified Coach, International Coaching Federation and Academy of Coach Training

Community/Industry Involvement

- American Lung Association, Board Member, Environmental and Occupational Health
- Pacific Safety Council, Board Member and Instructor
- Coalition of Labor Union Women
- International Brotherhood of Electrical Workers 465

Presentations

- International Conference of American Society of Safety Engineers
- Various industry and professional workshops and conferences
