

Security Assessment and Solution

Business Problem

A global provider of high performance computing and reliable storage devices seeks a solution for stolen goods from its central production facility and warehouse.

Solution

As a community service, we arranged for company to receive free security audit (through their local police department). This was suggested as a step before considering investing funds into a solution they may not need.

Outcome

After security audit, company contracted with a fence and electronic gate company which resulted in better protection of products, and reduced theft of property.
